

Grip-Rite® Plastic Concrete Accessories

Designed for use with rebar, mesh, and concrete forming

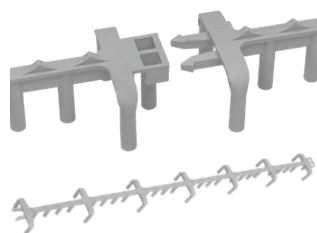

PRODUCT DESCRIPTION

Grip-Rite offers a popular line of plastic concrete accessories to complement the already large selection of Grip-Rite branded wire concrete products. These products provide support and forming solutions, as well as jobsite safety. The plastic concrete accessories line consists of plastic slab bolsters, plastic mesh chairs, rebar mushroom caps, and rebar OSHA caps.

PLASTIC SLAB BOLSTER

Flexible, high strength plastic, supports initial layer of reinforcing steel.

Features

- Locking ends create a durable connection between bolsters
- Wide, stable base provides a firm foundation
- Protruded top allows for accurate, consistent rebar placement, and spacing
- Rust free

PLASTIC MESH CHAIR

Holds rebar and wire mesh off the ground for initial pour.

Features

- Wide, circular base provides stability on all surfaces
- Made from heavy duty plastic to support heavy loads
- Variety of sizing to fit all jobsite needs ¼"-6"
- 2 placement options per chair, allows for adjusting on uneven surfaces

REBAR MUSHROOM CAPS

Offer high visibility to mark rebar placement.

Features

- Bright orange for high visibility
- Warning: will not protect against impalement

REBAR OSHA CAPS

OSHA approved safety device designed to protect against impalement.

Features

- Reusable, high-quality polymer technology with steel reinforcement
- Bright orange for high visibility
- Fits #3 - #11 reinforcing bar
- CAL OSHA Approval # C-1735-AG
- Also used as landscape and survey stake markers
