

NINJA

HIDDEN DECK CLIP

Grip-Rite Ninja® Hidden Deck Clip is your time-saving solution for grooved deck board installation.

Packed with innovative features that save you from the frustration of clips falling out of the groove during installation. Precision levers keep the fastener securely in place and evenly space deck boards, making installation quick and easy.

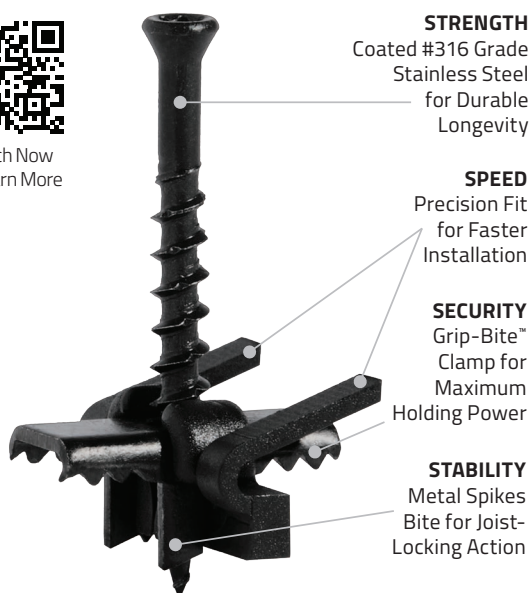

Simply insert the clips into the board along each joist, slide the next deck board in place, and fasten the coated PrimeGuard Max® #316 stainless steel marine-grade screws.

The Grip-Bite™ clamp has serrated razor teeth that grab the grooves on either side for maximum hold. For ultimate design freedom, our Flex-Fit™ universal clip accommodates straight, diagonal or herringbone patterns using a single style clip.

You'll get the job done right in less time with a beautiful, long-lasting finish, thanks to the Grip-Rite Ninja® Hidden Deck Clip.
