

CONSTRUCTION SCREWS

For Interior Applications

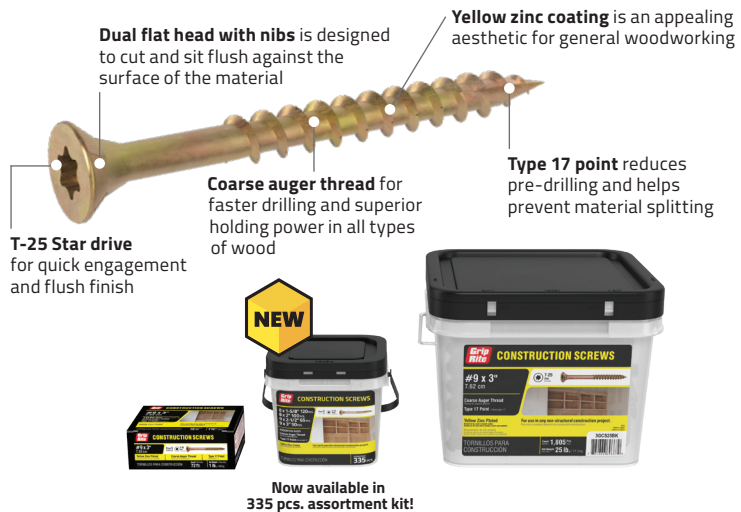

WE BUILD AMERICA®

Grip-Rite® Construction Screws are the choice of value-conscious contractors who want professional results from a brand they know and trust. These Construction Screws are a reliable choice for a multitude of fastening solutions, including cabinet installation, shelving, general woodworking, framing, subfloors, and more.

Construction Screws

Grip-Rite® Construction Screws are the reliable choice for a multitude of indoor fastening solutions, including cabinetry, trim, doors, shelving, general woodworking and non-structural framing, among others. Featuring T-25 Star drives and type 17 points, they engage quickly and do not require pre-drilling. An all-purpose screw for reliable results during interior construction.

Construction Screw
Available in sizes 1-1/4" – 3-1/2" in 1 lb & 5 lb boxes & 10 lb buckets

Trim Head Construction Screws

Grip-Rite® Trim Head Construction Screws feature a T-15 star drive trim head suited to materials used in finish work. The type 17 point reduces pre-drilling and helps to keep material from splitting. Coarse threads with reverse threading pull the material substrates together for a solid, tight connection.

Trim Head Construction Screws
Available in sizes 1-5/8", 2-1/4" & 3" in 8 oz clamshells & 1 lb boxes
